

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday, OCTOBER 4th 1945

Mr. and Mrs. Whitlock and daughter, of Lumsden, Alta are visiting at the home of Mr and Mrs H. Morrison. Mr Whitlock was C. N. Station Agent here some years ago.

Mrs. Ralph Whelan sold their home to the U. F. A. Co-op Company.

Mrs. Paul Seeger returned Saturday from Vancouver, after having visited for a month with her daughter.

Pte. Joe Damsgard is spending a short leave with his father, M. Damsgard.

Roy Greenwood, of Chauvin, Alta. is visiting for a few days with his mother.

Mr. August and Mr. and Mrs. Walter Rosenau and two children motored to Calgary on Monday.

Born—To Mr. and Mrs. Jack Rosenau on Oct. 4th, in the Esler hospital Cereal, a son.

Wedding Announcement

Mr. and Mrs. P. G. Peterson of Chinook announce the marriage of their two daughters, Pearl Viola to Mr. Jack Raymond Shaver of Benton, Alta., and Bernice Irene, to Mr. James Murray Coates of Cereal, Alta.

The marriage will take place on Saturday, October 6th in the Chinook United Church at 4 p.m.

Weekly Rendezvous Club

The Chinook girls Sewing Club was held at Jeanette Morrison's home on the evening of Saturday, Sept. 29th.

A good time was had by all, and after a dainty lunch the Club adjourned.

The Club will meet Saturday, Oct. 6th at the home of Virginia Lee.

Speaking Of Shortages

Speaking of shortages, friend, have YOU noticed any?

All right, take it easy! So you couldn't get the promise of a new reaper binder earlier than 1947 and you had to pay \$2,000. at an auction sale for a machine Methuselah used?

I was talking to a chap yesterday who'd come up against a shortage too. He was short an arm and a leg. His old ones weren't worn out -- he'd have been glad to keep them, but the Nazis took them in North Italy. He won't find any auction sale to buy new ones either.

Another fellow I ran across, home on leave, is short five years of his life -- he lost them over in Europe, training to beat the Germans. Then he volunteered to be short another year or two -- when and if he got home from helping beat the Japs. Now he may have to go and help police them, as so many young men will.

And there's my neighbor, Mrs. Chas. Jones. She has a family shortage -- two sons lost, one on land and one on sea. You know her too? Good! Know what she's doing to help fill the empty hours? She's keeping the Wartime prices and Trade Board check on quality and prices, helping fight off inflation.

U. F. A. Co-op Store GRAPES

Ontario and B. C. Grapes will arrive in a few days and you can book your requirements.

APPLES

Fancy and C. Grade wrapped McIntosh in stock. This is the Apple you have been waiting for. Reports indicate a small crop, and you will be wise to get your orders in early.

We had it before...
LET'S NOT HAVE IT AGAIN!

**The Worst Inflation came after the last war
NOW is the Real Testing time ...**

The only controls that are being maintained are those that aid the production of needed supplies and their speedy and fair distribution to the public, and which prevent an inflationary price rise.

As soon as conditions warrant, these will be dropped.

Until industry gets back to normal production, price ceilings, rationing and some controls are a necessary safeguard for everyone of us.

Keep them working.

IT'S YOUR JOB AND YOUR SAVINGS THAT ARE AT STAKE

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.

AS ALWAYS — MAKE

The Pick of Tobacco

Radar

SCIENTIFIC PROGRESS was swift during the war, and there were many phenomenal developments in that field. Some of them will prove to be of value only for purposes of war, but others will have important peace-time uses. One of these is radiolocation, better known to the public as "radar". One of the most closely guarded secrets of the war, radar is generally believed to have contributed more than any other scientific factor to the Allied victory. The British Ministry of Information has recently published an interesting pamphlet on the history of this device, which it described as "the most novel and versatile weapon of the century." Originally designed for defense, radar proved also to be a powerful weapon of offense, and it is predicted that it will be "as valuable in peace as it has been revolutionary in war."

Had Many Uses In War At Sea Radar played a large part in the success of the decisive Battle of Britain. In this connection, Air Chief Marshal Sir Arthur Tedder has stated, "If radar had not prevented the Germans from obtaining the element of surprise in the raid on England, I hate to think of where we might have been." Early in the war it was used for the location of enemy planes in the skies over, and approaching England, but later radar was made available for many other purposes. In naval warfare it was used to make possible the bombing of ships at sea, regardless of fog conditions. It was also used to perfect the "blind fire" technique in naval gunnery, and it proved invaluable in the detection of enemy ships, submarines, and planes at sea. Many lives were saved by the use of radar in "air-sea rescue" operations and on "D-day." Day it was a highly important factor in the success of that great amphibious operation.

Tribute Paid To Canadians In the closing months of the war in Europe, radar was used to overcome the effectiveness of the first flying bomb, and it was about to be successfully employed against the V-2 weapon, when Germany's collapse ended that menace. Now that it is no longer required for war, radar will still be used for many purposes. It will remove many of the hazards of air and sea travel during foggy weather, and it is believed that it may be put to use on motor highways to cut down the number of traffic accidents. Radiolocation was discovered and developed by British scientists, but credit is given to Canada's part in its success. In the manufacture of radar equipment and the training of highly specialized technicians, many thousands of whom served in Britain, Canada has made an important and valuable contribution to this great scientific development.

The Kindly Way

Abraham Lincoln Convinced Man He Was Under For Job

Abraham Lincoln once found it necessary to repulse the efforts of a certain entirely unorthodox and incompetent representative for the post of doorkeeper of the House of Representatives. But the President repulsed him gently and whimsically, without hurting his feelings, in this manner: "So you want to be doorkeeper of the House, eh?"

"Yes, Mr. President."

"Well, have you ever been a doorkeeper? Have you ever had any experience in doorkeeping?"

"No sir."

"Have you read any text on the subject?"

"Have you ever conversed with anyone who has read such a book?"

"No, sir; I'm afraid not, sir."

"Well, then my friend, don't you see that you haven't a single qualification for this important post?" said Lincoln, in a reproachful tone.

"Yes, I did take the 'apprentice' and he took me home, almost gratefully."

Wonder Drug

British Doctors Cure Many Ills With Penicillin

The Manchester Guardian, England, reports another remarkable success in the use of penicillin, this time as a cure for influenzal meningitis. United Kingdom doctors have already successfully used the British "Woolly Bug" to cure a large number of cases of meningitis, pneumonia, and pleurisy to great gratification. The germ of influenza meningitis, however, was hitherto regarded as insensitive to penicillin. Nevertheless after Manchester doctors had used it on a child suffering from the illness he responded almost immediately ultimately making a complete recovery.

Value Of Friendship

By Georgia Harriman Owen In The New York Herald-Tribune

Let us recall the ingenuity of Lord Cunard, at the time of our war with Spain, in restricting the Spanish fleet on the Atlantic. Manila, the Suez Canal, with just enough coal to enable it to reach Barcelona. England intercepted Spain's plans. Again, when Dewey was in occupation of Manila Bay and the Kaiser showed his hand by sending over Admiral von Dierich, England again stepped in. In such acts as these we find the true spirit of friendship for us in the hour of need.

Henry Wickham, Stead, in his review, "Through Thirty Years," of events that preceded the World War, gives some interesting facts not generally known. He reveals that there was a movement in 1898 in the part of certain European powers "to bring the world's people together in alliance against the United States." What could we have done with our inadequately equipped army and navy against such overpowering forces?

It would have meant overwhelming defeat for us had not Great Britain intercepted and frustrated their plans

—there might not have been any "Star-Spangled Banner" waving proudly over our land today!

Mineralized Waters

Roy Commission To Study Development Of Waters Of Lake In Saskatchewan

The medical benefits and commercial possibilities of the development of the highly mineralized waters of Little Manitou Lake, near Watrous, Sask., have been made the study for royal commission by the Saskatchewan Government.

Plans have been made up the commission: J. G. Rempel, University of Saskatchewan scientist; W. A. Ridder, provincial laboratory director; Dr. B. Brachman, Regina, and Dr. W. P. John, Viscount.

Little Manitou Lake waters have been noted for their buoyancy and for reported health-giving qualities in rheumatic and skeletal diseases.

Plans have been made to sell the lake's waters through drug stores. More than 15 years ago a company began exploitation of the great mineral bed under the lake waters but development halted because of financial troubles.

—Financial Post.

The only exception to the law requiring all persons to sign their official documents in England is the royal family, who sign only their baptismal names.

Price Control And Rationing Information

—We are being asked to keep the labels and sales slips off any merchandise we buy in case we have reason to complain about high price or poor quality. How do I go about registering a complaint?

—First you should do what you have always done—discuss any unsatisfactory purchase with your retailer. If he feels it is his duty he will make an adjustment for you and take the matter up with his supplier. If, however, the retailer or his customer do not feel they are satisfied with the results of this discussion they can give the facts to the local office of the War-time Prices and Trade Board for further check.

—I have to have special meat in my diet. Can I get more meat coupons for this purpose?

—Yes, however you must have a doctor's or hospital's certificate which must state on it the amount of meat you will require for your special diet. This should be sent or taken to the nearest ration branch office.

—Our church group wants to make over some adults clothing into children's clothing to be sent to the UNRRA clothing drive. Could you tell us where we could get tips on how to make over cast-off clothes?

—"Remake Wrinkles" is a booklet which will give you many valuable suggestions in the making-over of clothes. You can get a copy from the Consumer Branch, War-time Prices and Trade Board in your province.

—Some friends tell me I can get dairy butter without any coupons. Is this correct?

—No. Dairy butter is rationed the same as creamery butter. One coupon entitles you to half a pound of butter.

—Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest War-time Prices and Trade Board office in our province.

Seed and Feed Oats and Barley

There is a shortage in coarse grains in Alberta because of drought, frost and heavy export demand; consequently anyone requiring seed or feed must get supplies now as likely little will be available next winter.

The elevator at Little Gem has 3,000 bushels of OATS, Agent Mr. O. Blair of Naco. These oats will likely be shipped out soon in order to close the elevator.

Seed Testing Service

In accordance with a promise made nearly two years ago, Line Elevators Farm Service now offers a complete seed testing service to growers of wheat, oats, barley, rye and flax. Examination and testing of samples will include consideration of five important factors.

1. **Germination.** Tests will be made heretofore.
2. **Weed Seeds.** The presence of noxious weed seeds will be reported if requested.
3. **Smut.** All wheat samples will be tested for hant (stinking smut) and tests will be made on oats or barley if requested. Reports will include recommendations as to seed treatment.
4. **Other Diseases.** As samples are removed from the germinators, they will be examined for the presence of other diseases.
5. **Mechanical Damage** to the seed will be determined since it has an important bearing on the method of seed treatment.

Farmers should instruct elevator agents as to which tests are required. Wheat samples will be grown and examined for varietal purity next summer if the farmer so desires.

This is the only single laboratory in Canada equipped to perform such a service. The equipment is first-class and the staff well trained. No effort will be spared to insure that methods of testing shall be similar in all essentials to those developed in Dominion Government laboratories.

Samples must be at least 4 ounces and not more than 6 ounces. Line Elevator agents will provide envelopes and seal them and mail them to Line Elevators Farm Service, Winnipeg.

THIS WAR VICTIM MOTHER and baby believe "only good Nazis are dead Nazis". Even though dead Nazi "Mom" obtained the overcoat which covers her and the baby. Millions of others in war-ravaged lands need your help. Give the used clothing you can give to the National Clothing Collection which will be carried on throughout Canada from October 1 to the 20th. The drive is sponsored by the United Nations Emergency Relief Fund and distribution to the liberated peoples of Europe will be under the direction of U.N.R.R.A.

A GOOD FARMER IS A GOOD PLANNER

The wheat pools have brought about narrow price as between grades, as between tough and dry grain and as between street and car load lots.

Wheat was handled in the 1944-45 crop year on a narrower margin than has ever existed in North America and probably in the world.

It is the duty and privilege of the grain producers of this province to deliver their wheat to Alberta Pool elevators.

It's the man who looks ahead who gets ahead.

GOOD management . . . essential to successful farming, as to any business enterprise . . . is largely a matter of timely marketing and careful spending . . . waiting for the time when it is most favourable to buy.

We all want things now . . . things we have not been able to get for the past several years. Some of these things are necessities . . . some are things that will contribute to our comforts and pleasures.

Eventually, these things will be more plentiful. By waiting a little longer, we will help to keep prices of things we need at lower levels and we will buy a better advantage when we do buy.

Meantime we can invest our savings in the safest securities obtainable . . . Victory Bonds. More Victory Bonds will be offered this Fall. They pay 3% interest . . . double bank interest . . . and they are "liquid capital".

If we need cash in an emergency any bank will buy Victory Bonds at any time. And any bank will loan money on Victory Bonds.

The Ninth Victory Loan will be our last opportunity to buy Victory Bonds for a whole year, so buy double this time—the same rate of savings as in previous loans will pay for twice as many bonds over the 12 month period.

FARMERS CAN BUY VICTORY BONDS ON CONVENIENT DEFERRED PAYMENTS THROUGH ANY BANK

... just sign a short form letter which Victory Loan Salesmen carry (banks have copies), ordering the bank to buy Victory Bonds for you. Pay 5% when ordering and the balance at any time during the next 12 months. The interest the bonds earn pays the interest on the bank loan.
